DR. JOHN BULL'S Compound Pectoral of Wild Cherry,

For the complete Cure of Coughs, Colds, Asthma, Bagnerhits, Influenza, Pains in the Sink and Bagast, Spitting of Bloon, and Consumption, BLOOR, AND CONSUMPTION,
Is rapidly advancing in the estimation of the public. It is no empirical nostrum; its component principles are made known to the entire medical faculty. It is prepared accurately from the recipe of an experienced and talented physician, and has proved itself to be the greatest remedy for all disoases of the Lungs ever discovered; and wherever it has been introduced it has made cures which are perfectly astonishing. It is bound to supersede every other Cough Medicine before the public. Testimonials are daily being sent in to the proprietor, of cures effected even after physicians had abandoned every hope. A single trial will convince the most incredulous of its efficacy in curing that class of diseases for which it is designed. Why is it that so many die every year of Cousumption, or some other disease of the Lungs? Because they neglect the sure forerunner—a "simple cold,"—which might be easily cured by the prompt use of a single bottle of Dr. John Bull's "Compound Pectoral of Wild Cherry." We say, therefore, Try it, by all means. It this does not cure you, nothing ean.

After breakfast, the party received their week's washing, from the steam laundries of the hotel.
